

Research Data Management Offboarding checklist

The following checklist aims to provide some guidance to what should be completed before you leave the university. Not all items will be relevant to your situation, but it can be helpful to use this as a reference.

#	Item/Step		
	Review and update your Research Data Management Plan (RDMP)		
		Update data storage details as required	
			Include any non-digital locations
		Is it appropriate for the researcher to take a copy of the data? If yes, how will it be stored?	
		Confirm minimum retention period	
			Set a date for the expiry of the minimum retention period
			Check and confirm any legislative requirements associated with the data
		Confirm data storage aligns with policy and RDMP	
			Ensure all data is store on appropriate/approved storage platforms
		Confirm researchers listed on the RDMP are up to date	
			Nominate a custodian (this should be your supervisor or lead investigator)
		Confirm the security classification of the research data	
	Review/update Ethics approvals		
		Update project team list	
		Check/update project details as required	
		Updated any changes to data storage	
	Review data directory/file structure and ensure collaborative folders are setup for easy handover		
	Prepare for handover		
		Create a handover document/file	
			Ongoing project work
			Documentation - Data collection - Datasets and data dictionary - Analysis - Ethics - Code - Licenses - Repository details
			Location of data and data access
			Details of ongoing data collection
			Any responsibilities within the research group - REDCap user sponsorship - Management of systems (ordering, maintenance, etc) - Equipment to be returned
			List of key contacts related to ongoing work
			Your future contact details - Personal contact details or contact details at new workplace in case there is a need to contact the person who is leaving after they have left
	Review/update contractual, funding, data, and legal agreements		
	Related publications and published data		

		Discuss authorship
		Transfer responsibilities to appropriate custodian
		Ensure data sharing agreement/s are in place (if data is being taken
		Ongoing access arrangements/requirements
		Extend credentials
		Publish data
