

Sample RDMP: Interviews, recordings and transcriptions

Project name *	Sample RDMP project	
Project key dates *	Project start date	01/03/2026
	Project end date	01/03/2029
Project Code *	rdmp_ntro	
Chief Investigator *	Prof J. Smith (<i>NOTE - if you are a HDR student, this will be your supervisor</i>)	
Faculty/Affiliation *	Sydney College of the Arts	
IRMA ID/s	This is optional, and can be filled in once IRMA ID for a grant has been created	
University ethics identifier	This is optional and can be filled in once a MyResearchEthics ID has been created	
Project Description *	This is a sample RDMP. This is an investigation about environmental impacts and how art can capture this. We will be conducting reviews on artists work, as well as developing a physical body of work.	
Data Classification *	Protected (<i>note - this is research data collected for publication both in writing and for exhibition</i>)	
Where will you store your data during project? *	Data collection, analysis, and storage Artist statements and their body of work will be examined and critiqued. Information generated and collected through this will be stored on the eNotebook (LabArchives). A physical body of work will also be produced as part of this research project. The documentation of the process from start to finish will be captured through images and scanned copies of sketches. These will also be stored on the eNotebook. Confidentiality and Privacy The confidentiality and privacy of artists statements and work produced through this study will be protected by: • Using The University of Sydney licenced platforms including eNotebook and RDS. • Sharing work and ideas to forums through a university platform such as eNotebook so that version histories are captured.	
Where will your data be stored after project completion, for the retention period? *	Upon the completion of the research project, all data will be moved to and stored on the RDS for the duration of the minimum retention period. Provisions for future use We are expecting to publish a series of articles as well as hold an exhibition. Research data will be made publicly available after	

	the completion of the project in as the data will be published in a repository. A copy of my eNotebook will also be taken with me at completion of this project.
How long does your data need to be retained? *	5 years (<i>NOTE - this is an example, and may not reflect your research project</i>)
Any special considerations for data management in this project?	None (<i>NOTE - this is an example, and may not reflect your research project</i>)
Are you storing any data from a third-party provider? *	No
Does your project include data about First Nations peoples?	No (<i>NOTE - this is an example, and may not reflect your research project</i>)
