

Sample RDMP: Field based sample collection and laboratory data collection

Project name *	Sample RDMP project	
Project key dates *	Project start date	01/03/2026
	Project end date	01/03/2029
Project Code *	rdmp_sample (Make sure this is noted down in your HREA)	
Chief Investigator *	Prof J. Smith (<i>NOTE - if you are a HDR student, this will be your supervisor</i>)	
Faculty/Affiliation *	Faculty of Science	
IRMA ID/s	This is optional, and can be filled in once IRMA ID for a grant has been created	
University ethics identifier	This is optional and can be filled in once a MyResearchEthics ID has been created	
Project Description *	This is a sample RDMP. This is an investigation about contaminants in wildlife, where samples will be collected in the field and samples will be processed at a government laboratory.	
Data Classification *	Protected (<i>NOTE – this is non human data which will be used for publication</i>)	
Where will you store your data during project? *	Data collection, analysis, and storage Field work sample collection and sample storage location will be recorded on eNotebook (LabArchives) or REDCap; with physical samples given a digital ID (sample ID). During laboratory analysis raw results will be collected with the data stored on the Research Data Store (RDS). Working copies of the data in preparation for statistical analysis will be stored on the University's OneDrive service (<i>NOTE - that these are not the only research platforms available, please see our this platform comparison table for more options</i>). These working copies can then be utilised for statistical analysis. Confidentiality and Privacy The confidentiality and privacy for this study will be protected by: • Collaborating with external laboratory through university licenced platforms. • Never storing data outside of University licenced platforms.	
Where will your data be stored after project completion, for the retention period? *	Upon the completion of the research project, all data will be moved to and stored on the RDS for the duration of the minimum retention period.	

	Provisions for future use We are expecting to publish a series of journal articles, conference papers and/or presentations using the results of this study. Additionally, raw data will be stored on RDS for possible reuse for ongoing projects.
How long does your data need to be retained? *	5 years (<i>NOTE - this is an example, and may not reflect your research project</i>)
Any special considerations for data management in this project?	None (<i>NOTE - this is an example, and may not reflect your research project</i>)
Are you storing any data from a third-party provider? *	No (<i>NOTE - this is an example, and may not reflect your research project</i>)
Does your project include data about First Nations peoples?	No (<i>NOTE - this is an example, and may not reflect your research project</i>)
